

THE VENTRIQ FOUNDER MEMBERSHIP

THE FOUNDRY

Where founders do the work.

A foundry is where metal is cast — and the person who casts it has always been called a founder. The name is literally true in both senses of the word.

WHY IT WORKS

01

TRUE IN BOTH SENSES

A metal caster is, by definition, a founder. The story needs no explaining and gets stronger every time it is told.

BUILT FOR OUTPUT

Foundries exist to produce. The name puts measurable production at the center of the brand — exactly what we score.

EXTENDS THE SUMMIT

Same fire-and-metal world as Forge The Future, without reusing the word. One universe, no name collision.

BRAND ARCHITECTURE
